# PORTFOLIO

Since 2016, XAAH has been trading and exporting in the field of Rocks & Minerals Primarily. We also Deal in all the comodities from Pakistan available For Trade and Export.

XAAH is the leading mining and trading agency of different types of rocks and minerals in Pakistan. Our mission is to mine and trade the finest quality products while staying on the path of perfection with consistency. XAAH aims to become the leader of the mining industry of Pakistan through a dedicated team of individuals. We have a vision to improve the export levels of the mining industry of Pakistan by working tirelessly in a coordinated manner. XAAH has a profound experience of more than 2 decades in the industry which has helped it to improve its work processes and extract the top-quality minerals from different types of mines. As a trade company, XAAH has expanded its network of services to almost all commodities in Pakistan. Our key trade products include different kinds of cash crops and textile products as well. Within the next 10 years, XAAH plans to expand to further areas of Pakistan in order to expand its operations and meet the rising demand for different types of rocks, minerals, and their by-products. XAAH promotes itself to be working at fair industrial practices without over-exploitation of the scarce resources in Pakistan.

# SALT

Pakistan has a vast number of pink salt resources located in the Himalayas and the Khewra region of Punjab province. Salt extracted from Pakistan is used in numerous industries which includes home decor, food preservation, de-icing, textile dyeing, leather processing and cutting board industry.

# 0

# SALT

The Pink Salt is much healthier compared to regular salt and is useful for the patients of asthma. The Himalayan salt has traces of salt minerals including calcium, potassium, and magnesium. XAAH has a vast experience in mining the best pink salt from Himalayas.

# Gemstone

Gem Stone is a high-value and high-demand stone that is extracted from Hunza Valley and Swat Valley in Pakistan. Gem Stone has different types each of which is used in the production of various rings for spiritual purposes and making other types of jewelry.

# 02

# Gemstone

XAAH has been extracting Emeralds, Agate, Ruby, Spinel, Feroza, Quartz, Turquoise, Sapphire, Ruby, Aquamarine, Tourmaline, and others etc. We are committed to refining and extracting the best quality gemstones with variations that can be used in different types of industries all over the world.

# Handicrafts

XAAH also deals in different types of handicrafts including Green Onyx marble, White Onyx Marble, and Salt. We have been working in the industry for the last 2 decades and have been involved in the manufacture as well as trade of numerous handicraft items.

# Handicrafts

The unique value we offer is in terms of exceptional quality and authentic items that are verified to be free from all kinds of defects. Our teams conduct various market surveys to stay up to date with the market trends and produce handicrafts accordingly.

# Onyx

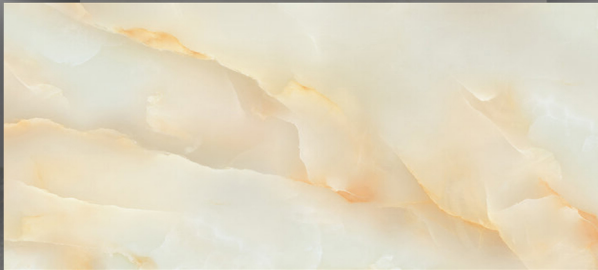

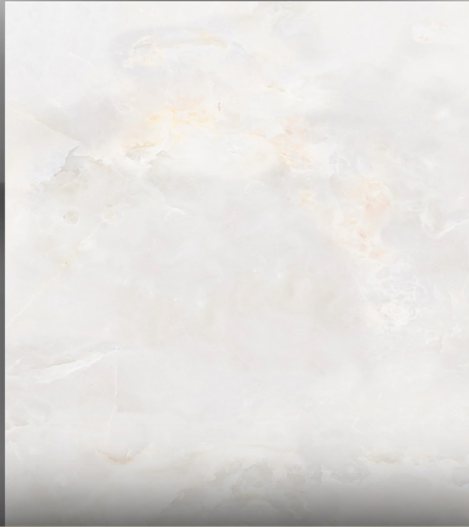

Onyx is one of the most premium forms of marble available in the market which is found in Dalbandin and Noukundi regions of Pakistan. XAAH has been extracting the Green Onyx and White Onyx over the last 4 years with supplies going round the globe.

4

# Onyx

Onyx is a key raw material used in the production of tiles, hardstone carving, jewelry, and spiritual rings. Green Onyx represents the symbol of purity and restfulness. White Onyx is also used for making jewelry and represents the symbol of clarity, focus and dedication.

# Black & Gold

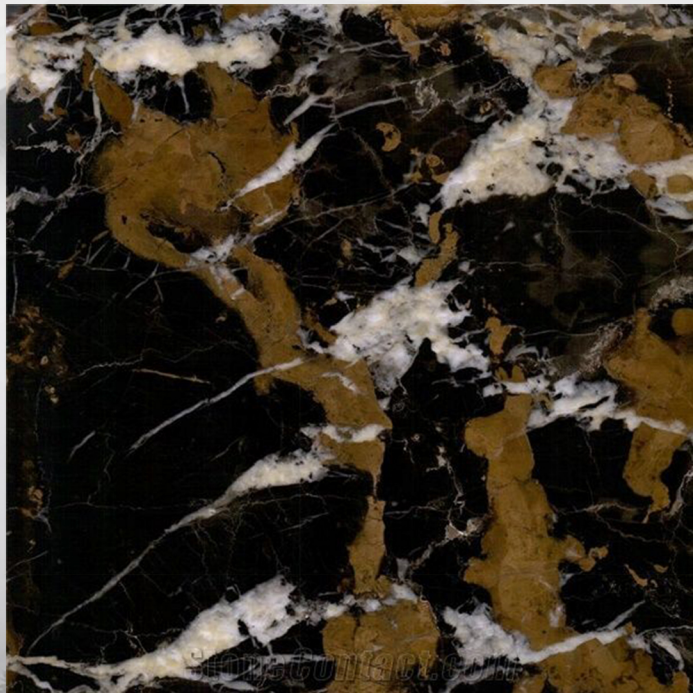

The Black Gold Marble was once considered as a representation of the elite and their wealth. It is used in the home improvement sector for making tiles for flooring, stairs, counter-top, and fountains. XAAH has extracted and traded Black Gold Marble for 4 years.

05

# Black & Gold

It truly adds an ornamental value to the modern homes giving them a luxury look. As it is less in quantity and requires different procedures to furnish in the final form, it becomes expensive but gives the right worth for the amount spent on it.

# Iron ore

XAAH has been extracting two types of Iron Ore from various areas of Pakistan including Nokundi, Kalabagh, and Haripur. One is the magnetite form which has a higher content of iron and can rust easily. It helps to produce iron bars for the construction industry.

# Iron ore

The Hematite form of Iron Ore is a high quality variant that is resistant to rust. It is used in the production of steel. It has a high demand all over the world due to the premium quality and its requirement in numerous industries.

# Copper Ore

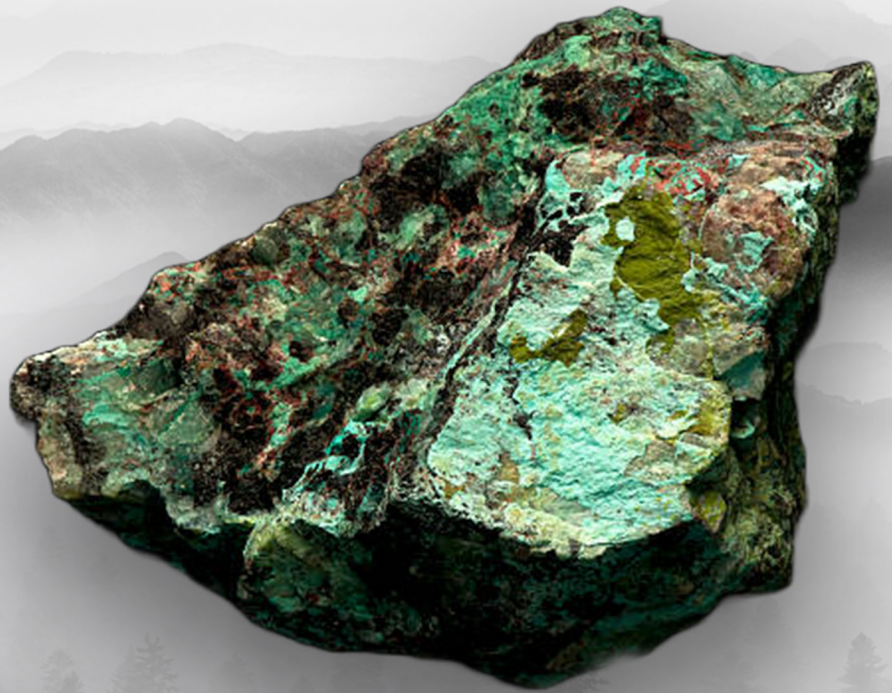

Copper Ore is one of the most commonly used metals in Pakistan as well as other parts of the world. It is primarily used in electrical appliances and their wiring. Copper is also used in the production of industrial machinery, roofing, and plumbing equipment.

# Copper Ore

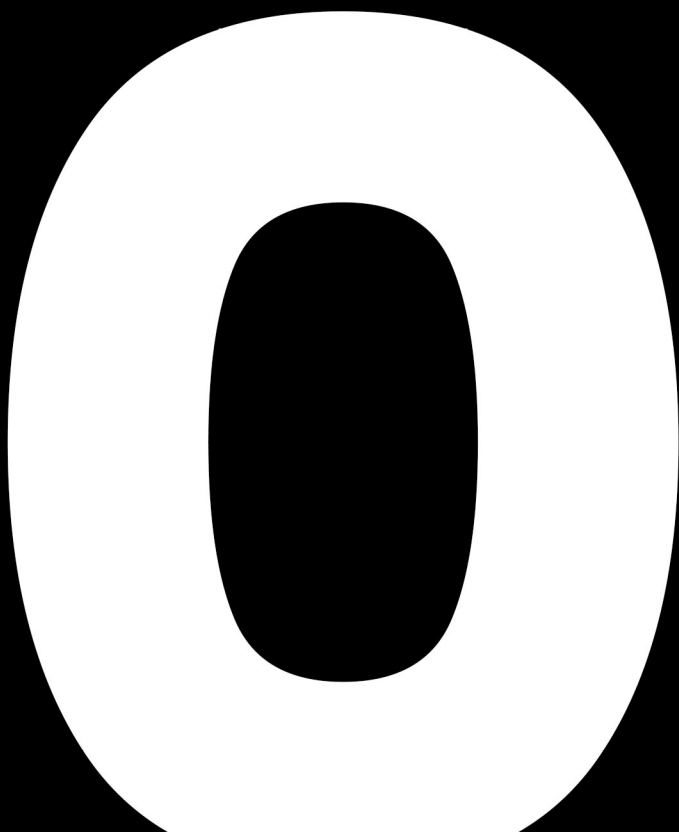

Pakistan has vast resources of Copper Ore present in the Reko Diq mines located in Chagai district of Balochistan Province. XAAH has extracted several thousand tons of Copper Ore from these mines in the last 10 years to fulfill the local and international demand.

# Granite

Granite is one of the toughest substances found within the Earth's core which is why it is used in different types of construction projects. Primary uses of Granite include making countertops, fireplaces, building monuments, jewelry, shelves, baths, and numerous kinds of flooring as well.

# Granite

Studies have shown that Pakistan has more than 1000 billion tons of Granite reserves in different variations including Black, Pink, Yellow, Green, Red, Gold, and Gray Granite. The reserves are located in Northern areas such as Gilgit, Dir, Swabi, Chagai, Nagarparker, Kohistan and Swat.

# Soap Stone

In recent years, Soap Stone has become quite popular in the home improvement industry for the numerous benefits. It is one of the best stones to help in heat insulation, acid resistance, and absorption resistance which helps in solidifying the construction to perfection.

# Soap Stone

SoapStone is used in making countertops, floors, kitchens, and different types of bath equipment. In Pakistan, SoapStone is found in the Hazara District of Pakistan. XAAH has increased the trade of Soap Stone from the last few years due to increase in demand.

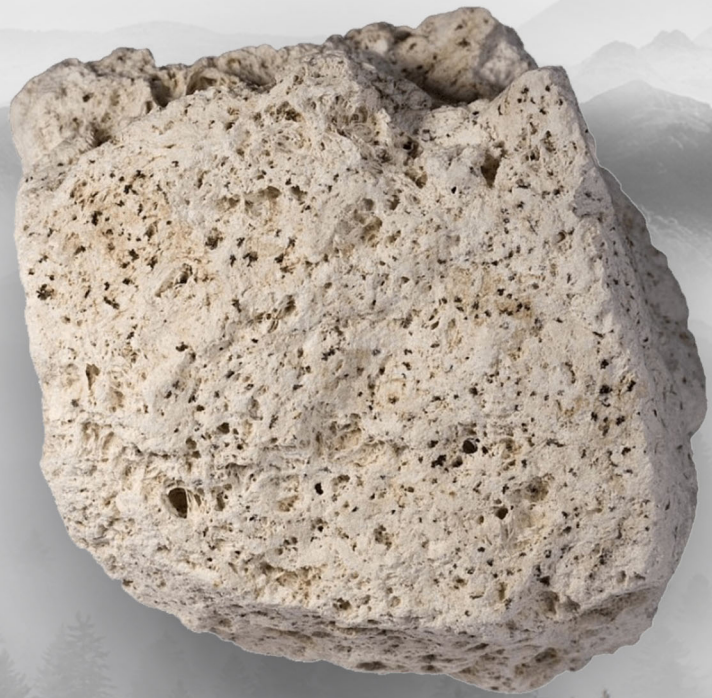

# Calcium Pumice

Calcium Pumice is a material that is specifically used for the purpose of maintaining a particular property. It helps in cleaning calcium deposits, limescale, water rings on toilets, and removing the rust and grease from different kinds of home improvement equipment.

# 10

# Calcium Pumice

Calcium Pumice is also used in making cement, concrete and breeze blocks as well as washing denim. XAAH has been mining and trading Calcium Pumice for the last 10 years. Our mining works are conducted and regularized in the Chagai district of Balochistan province.
